Dear Dr Marsden

There are no plant health restrictions on importing Biohumax as long as it is produced in Bulgaria. Providing that all worms are removed, this product would be considered as a growing medium. The import of soil and growing medium from countries belonging to continental Europe is not prohibited under Schedule 3A, (14) of the Plant Health (Great Britain) Order 1993. Therefore a Plant Health Licence is not required

Regards

*Fran Kemp*
